Advanced Time & Attendance Solution for Your Business

allGeo field service management platform provides solutions such as advanced time clocking using GPS, geofence and QR code; complex pay pay rate calculations; automatic mileage logging; and EVV (electronic visit verification) for home-care providers.

allGeo Time Clock helps businesses:

3 Generate compliance, time & attendance reports for payroll

1 Schedule and assign tasks to field employees in real-time

2 Get attendance information on field employees in real-time with Geofencing and QR codes

4 Exchange data (bidirectional) with ADP Workforce Now and ADP Workforce Now Next Generation

5 Automate pay rate calculations using rate codes based on employee profile, sites, tasks and shifts

6 Automate field service workflow with end-to-end process integration i.e. ERP to Field Operations to Payroll system

> "We're the industry-leading, technology solutions provider. We have several hundred field technicians nationwide installing and maintaining equipment – and managing a large team like that became a real challenge," said Jim West, Vice President of Strategic Alliances at Velociti Inc. "We also needed a solution that could seamlessly support our ADP payroll and HR software. We engaged allGeo through our ADP team, and they dug into our workflow and implemented a GPS-verified time & attendance and accountability solution that does more than we could have expected. Now we have a live map status view of our field technicians around the country and eliminated the hassle of paper travel logs. We're very pleased with allGeo."

-Jim West
Vice President of Strategic Alliances at Velociti Inc.

With allGeo Time Clock, employees can:

- Receive details about their scheduled jobs

- Get automatic reminders to log time

- Clock in/clock out

- Enter hours worked

- On site supervisors can check-in employees (crew punching)

- View status of time sheets

- Track mileage for reimbursement

- Transmit their location to headquarters

- Scan QR codes to capture jobs related information

- Collect pictures, signatures and other information via forms

How does the integration with ADP Workforce® Now and WFN NextGen work?

allGeo integrates with ADP Workforce Now for bidirectional exchange of employees, schedules, attendance, and their field activity logs. This is a real-time integration that pushes payroll-related data from the allGeo application to ADP® Users can configure this to be an automatic process with little human intervention.

With allGeo, you can track time against tasks, jobs and customers to help estimate labor and job costing. You can also run scheduled and on-demand reports based on employee groups, customers, work orders / jobs and more. Overtime and double overtime configurations can be customized to help manage payroll through allGeo's data integration with ADP Workforce Now.
