Champion Windows Modernizes Workforce Operations with allGeo Field Workforce Automation
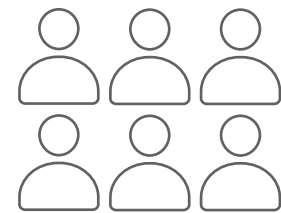

allGeo

Introduction

Champion Windows is a leading company in the construction industry, specializing in the design, construction, and installation of premium-quality windows, doors, and sunrooms. With a large and growing workforce spread across the nation, Champion Windows faced the challenge of modernizing their field workflows and improving operational efficiency.

2500+
Employees

Their key objectives included automating time tracking and integrating with ADP Workforce Now for payroll, creating job costing reports, and implementing efficient task dispatch processes. To address these challenges, Champion Windows turned to allGeo and its seamless integration with ADP Workforce Now.

Challenges Faced

Champion Windows encountered several challenges associated with managing a geographically dispersed workforce and the need to streamline their operational processes. The primary issues included the lack of automated time tracking and integration with ADP Workforce Now, inefficient job costing reports, and the absence of a robust task dispatch system. These challenges resulted in inefficiencies, inaccuracies in payroll processing, and limited visibility into employee activities in the field.
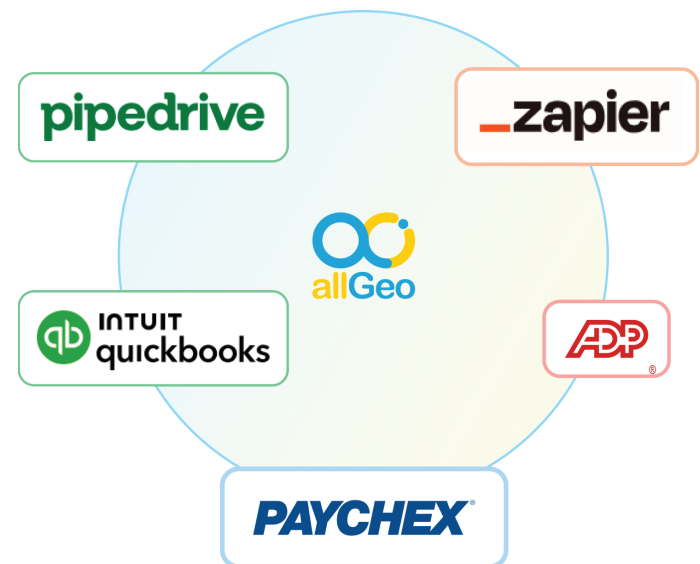

Solution Implemented

To address these challenges, allGeo provided Champion Windows with two key workflows tailored to their unique requirements. The first workflow focused on time clocking against pay codes, utilizing GPS tracking and geofencing to automate time clocking. This allowed employees to log time against specific task codes for ADP payroll processing, while different employee groups had their own specific rules in place.

Tasks

The second workflow centered on granular task tracking and status information, incorporating rate codes, mobile forms, GPS-tagged photos, QR codes, geofencing, and forms to collect job-related data for job costing reports. Additionally, allGeo's platform enabled managers to monitor employees' real-time locations on a map view and receive live alerts for various statuses, enhancing visibility and control over field operations.

Results and Benefits

By leveraging allGeo's field workforce automation solution, Champion Windows successfully modernized their workforce operations and achieved significant improvements in several key areas. The integration with ADP Workforce Now streamlined payroll processes, leading to more accurate and efficient payroll management.

The implementation of granular task tracking and status information enhanced job costing reporting, providing insights into resource allocation and project profitability. Furthermore, the real-time map view and live alerts empowered managers to make informed decisions and optimize field operations. Overall, Champion Windows experienced increased operational efficiency, improved accuracy in payroll processing and job costing reports and enhanced visibility into field activities.

Conclusion

In conclusion, the partnership between Champion Windows and allGeo has proven to be instrumental in driving operational excellence and modernizing workforce management. By addressing the company's specific challenges through tailored workflows and seamless integration with ADP Workforce Now, allGeo's field workforce automation solution has empowered Champion Windows to streamline processes, enhance visibility, and improve overall

About allGeo

allGeo is a leading provider of field service management for mid-size & enterprise businesses to achieve excellence in field service operations by providing tools to improve operations & payroll processes. The allGeo platform helps businesses create custom field service workflows using products & tools such as Scheduling, Time Clock, Tracking & Monitoring, Mileage, Dispatch Messaging, Mobile Forms, Events based alerts, and Reporting.

Examples of workflows include - Time tracking using geofence and pay rate logic for Payroll, QR and Geofence sites for jobs tracking, Lone worker safety with E911 integration, Electronic Visit Verification (EVV) for home health care, and Field Inspection using QR / mobile forms.
